

2024 年 6 月大学英语六级真题（第一套）

Part I

Writing

(30 minutes)

Directions: For this part, you are allowed 30 minutes to write an essay that begins with the sentence “*Nowadays more and more college students have come to realize social practice and academic learning are equally important.*” You can make comments, cite examples or use your personal experiences to develop your essay. You should write at least 150 words but no more than 200 words. (You should copy the sentence given in quotes at the beginning of your essay.)

【参考范文】

“Nowadays more and more college students have come to realize social practice and academic learning are equally important.”

In today's competitive world, the role of college education extends beyond academic learning to encompass practical experience through social practice. This shift in perspective is crucial as it prepares students not only for theoretical knowledge but also for real-world challenges. Academic learning provides a solid foundation of knowledge and critical thinking skills, while social practice enhances these abilities by applying them in practical settings.

One significant benefit of social practice is its ability to bridge the gap between theory and application. For instance, internships, community service projects, and industry collaborations allow students to apply classroom knowledge to real-life situations. This hands-on experience not only deepens understanding but also fosters skills such as teamwork, communication, and problem-solving — skills that are highly valued by employers.

Moreover, social practice cultivates a sense of responsibility and empathy by engaging students with diverse communities and societal issues. By actively participating in volunteer work or social projects, students develop a broader perspective and a greater appreciation for the interconnectedness of academic knowledge and social impact.

In conclusion, while academic learning provides the intellectual framework, social practice enriches education by instilling practical skills and fostering a well-rounded development of students. Recognizing the equal

CET-6 大学英语六级真题（研读版）

importance of both academic learning and social practice is essential for preparing students to succeed in their careers and make meaningful contributions to society.

【范文译文】

“如今，越来越多的大学生认识到社会实践与学术学习同等重要。”

在当今竞争激烈的世界中，大学教育的作用已经超越了学术学习，而是通过社会实践来积累实践经验。这种视角的转变至关重要，因为它不仅为学生学习理论知识做好准备，也为他们应对现实世界的挑战做好准备。学术学习提供了坚实的知识基础和批判性思维能力，而社会实践则通过在实际环境中应用这些知识和技能来提高这些能力。

社会实践的一个重要好处是，它能够弥合理论与应用之间的差距。例如，通过实习、社区服务项目和行业合作，学生可以将课堂知识应用到实际生活中。这种实践经验不仅能加深理解，还能培养团队合作、沟通和解决问题等技能，而这些技能都是雇主非常看重的。

此外，社会实践通过让学生参与不同的社区和社会问题，培养学生的责任感和同理心。通过积极参与志愿工作或社会项目，学生可以开拓更广阔的视野，更深刻地认识到学术知识与社会影响之间的相互联系。

总之，学术学习提供了知识框架，而社会实践则通过灌输实践技能和促进学生的全面发展来丰富教育。认识到学术学习和社会实践的同等重要性，对于培养学生在职业生涯中取得成功并为社会做出有意义的贡献至关重要。

Part II

Listening Comprehension

(30 minutes)

Section A

Directions: In this section, you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on Answer Sheet 1 with a single line through the centre.

Questions 1 to 4 are based on the conversation you have just heard.

1. A) Read numerous comments users put online.

CET-6 大学英语六级真题（研读版）

- B) Blended all his food without using a machine.
- C) Searched for the state-of-the-art models of blenders.
- D) Did thorough research on the price of kitchen appliances.

2. A) Eating any blended food.

B) Buying a blender herself.

C) Using machines to do her cooking.

D) Making soups and juices for herself.

3. A) Cooking every meal creatively in the kitchen.

B) Paying due attention to his personal hygiene.

C) Eating breakfast punctually every morning.

D) Making his own fresh fruit juice regularly.

4. A) One-tenth of it is sugar.

B) It looks healthy and attractive.

C) One's fancy may be tickled by it.

D) It contains an assortment of nutrients.

@一起考个四六级

Listen

主题：买了个搅拌机……

M: I've just bought a new blender.

W: What's that?

M: A blender, you know, a machine that blends food.

W: Ah, yes. Of course. The electric kitchen appliance

M: Exactly. This one is state of the art. I've been meaning to buy one for a while. 1) And I did thorough research on which specific model to get. I read through maybe hundreds of online user reviews. Anyway, it's amazing!

W: Really? What could be so special about it? I mean it's just a blender.

M: Well, basically, it's just a very good one. It feels heavy and sturdy and well-made. It also has lots of power and can easily cut and crush practically anything. This way, the soups and juices I make come out really fine and smooth with no lumpy bits.

CET-6 大学英语六级真题 (研读版)

W: Em, I see. 2) I have never thought of getting one myself. It sounds like the kind of thing that, for me personally, I would rarely use.

M: I've never had one before. And now that I do, I use it all the time. 3) I make a fresh fruit juice in the morning. Maybe not every morning, but 3 or 4 times a week, and it feels fantastic. It's a really healthy habit.

W: I can imagine that must feel quite satisfying. I can picture you getting all creative in the kitchen and trying out a multitude of different ingredients. And it's obviously going to be healthier than buying packaged juice from a supermarket.

M: It's so much healthier. It's not even close. 4) Did you know that store-bought juice is like 10% sugar?

W: Right. So then you bought it for the health benefits?

M: Mostly yes. Basically, it allows me to have a more varied diet with a far wider assortment of nutrients, because it's not only fruit in my morning juices you see. I can also throw in vegetables, nuts, yogurt, cereals, anything that tickled my fancy.

Questions 1 to 4 are based on the conversation you have just heard.

1. What does the man say he did before buying the blender?
2. What does the woman say she has never thought of doing?
3. What does the man say is a really healthy habit?
4. What do we learn about store-bought juice from the conversation?

Questions 5 to 8 are based on the conversation you have just heard.

5. A) How he has made himself popular as the mayor of Berkton.
B) How the residents will turn Berkton into a tourist attraction.
C) How charming he himself considers the village of Berkton to be.
D) How he has led people of Berkton to change the village radically.
6. A) It was developed only to a limited extent.
B) It was totally isolated as a sleepy village.
C) It was relatively unknown to the outside.
D) It was endowed with rare natural resources.
7. A) The people in Berton were in a harmonious atmosphere.

CET-6 大学英语六级真题 (研读版)

B) The majority of residents lived in harmony with their neighbors.

C) The majority of residents enjoyed cosy housing conditions.

D) All the houses in Berkton looked aesthetically similar.

8. A) They have helped boost the local economy.

B) They have made the residents unusually proud.

C) They have contributed considerably to its popularity.

D) They have brought happiness to everyone in the village.

Listen

主题：乡村变化……

W: Today we have a very interesting guest, Mr. Thomas Benjamin Grimm, the mayor of Berkton. He's here to talk about his job and responsibilities overseeing this charming village. Mr. Grimm, thank you for being here.

M: Thank you for having me.

W: I'd like to start by saying the obvious. 5) Burton has become one of the most popular tourist destinations in the country. And this has happened under your watch. Just how did you achieve this?

M: The achievement belongs to all the residents of Burton. It was a shared effort where everybody pitched in for the communal good.

W: But how did this change happen? 6) In about 10 years, Burton has gone from a relatively unheard of sleepy village to a must see destination.

M: Yes, the change has truly been remarkable. Berkton was always fortunate to be endowed with such a beautiful, natural allure. The Agoura hills above the village remain untouched by human development. And the Sonora valley just below it is equally stunning. The transformation commenced in a town hall meeting in spring 2008 over 10 years ago. Now, when an overwhelming majority of neighbors voted in favor of Motion 836. 7) This legislative proposal essentially set out to harmonise the aesthetic appearance of all the houses in Berkton. The idea was that if all the properties looked a certain way we've shared design features, then the village as a whole would look more beautiful. And it worked.

W: It certainly did. I'm looking now at a before-and-after photo, and the change is truly remarkable. It's hard to believe it's the same place. How do the neighbors feel now?

CET-6 大学英语六级真题 (研读版)

M: Great pride. I would say.

W: But what about the multitudes of visitors now crowding the streets? Is everyone happy about that?

M: 8) The tourists we receive are a blessing as they have completely revitalized our local economy. Every visitor is warmly welcome.

Questions 5 to 8 are based on the conversation you have just heard.

5. What is the question the woman asked Mr. Grimm after the introduction?
6. What do we learn about Berkton 10 years ago?
7. What resulted from the passing of the legislative proposal *Motion 836*?
8. Why does the man say the tourists are a blessing to Berkton?

Section B

Directions: In this section, you will hear two passages. At the end of each passage, you will hear three or four questions. Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on *Answer Sheet 1* with a single line through the centre.

Questions 9 to 11 are based on the passage you have just heard.

9. A) They have created the smallest remote-controlled walking robot in the world.
B) They are going to publish their research findings in the journal *Science Robotics*.
C) They are the first to build a robot that can bend, crawl, walk, turn and even jump.
D) They are engaged in research on a remote-controlled robot which uses special power.
10. A) It changes its shape by complex hardware.
B) It is operated by a special type of tiny motor.
C) It moves from one place to another by memory.
D) It is powered by the elastic property of its body.
11. A) Replace humans in exploratory tasks.
B) Perform tasks in tightly confined spaces.
C) Explore the structure of clogged arteries.
D) Assist surgeons in highly complex surgery.

CET-6 大学英语六级真题（研读版）

Source: Silicon Republic

Title: Researchers develop tiny robotic crab that is smaller than a flea

Researchers in the US have created a remote-controlled robot that is so small it can walk on the top of a US penny. In research published in the journal *Science Robotics*, a team at **Northwestern University** said the crab-like robot is 0.5 millimeters wide. 9) Researchers described it as the smallest-ever remote-controlled walking robot. The tiny robot can bend, twist, crawl, walk, turn and even jump, without the use of complex hardware or special power. 10) The engineers said this is because the robot is powered by the elastic property of its body. To construct the robot, the researchers used a shape-memory alloy material that transforms to its remembered shape when heated. Using a laser, the team is able to heat the robot at specific parts of its body, causing it to change shape. As the robot deforms and goes back to its original shape, it creates movement from one place to another. "Because these structures are so tiny, the rate of cooling is very fast," project lead, professor John A. Rogers said. "In fact, reducing the sizes of these robots allows them to run faster." 11) While the research is still in the exploratory phase, the team believes that technology could lead to micro-sized robots that can perform practical tasks in tightly confined spaces. "You might imagine micro-robots as agents to repair or assemble small structures or machines in industry or as a surgical assistance to clear clogged arteries, to stop internal bleeding or to eliminate cancerous tumors – all in minimally invasive procedures," Rogers said.

Questions 9 to 11 are based on the passage you have just heard.

9. What does the passage say about a team of researchers at Northwestern University?
10. What did the researchers say about the robot they created?
11. What do the researchers expect their robots to do in the future?

Questions 12 to 15 are based on the passage you have just heard.

12. A) She threw up in the bathroom.
B) She slept during the entire ride.
C) She dozed off for a few minutes.
D) She boasted of her marathon race.

CET-6 大学英语六级真题（研读版）

13. A) They are mostly immune to cognitive impairment.
B) They can sleep soundly during a rough ride at sea.
C) They are genetically determined to need less sleep.
D) They constitute about 13 percent of the population.
14. A) Whether there is a way to reach elite status.
B) Whether it is possible to modify one's genes.
C) Whether having a baby impacts one's passion.
D) Whether one can train themselves to sleep less.
15. A) It is in fact quite possible to nurture a passion for sleep.
B) Babies can severely disrupt their parents' sleep patterns.
C) Being forced to rise early differs from being an early bird.
D) New parents are forced to jump out of bed at the crack of dawn.

@一起考个四六级

Title: I thought having a baby might turn me into an 'elite sleeper'. I was wrong

I don't want to boast or anything, but I have always considered myself something of an elite sleeper. Given the opportunity, I will sleep for marathon stretches and can doze through the most extreme situations. 12) On one very rough ferry crossing on the route to the Isles of Scilly, for example, my traveling companion spent the entire three-hour ride throwing up in the bathroom while I dozed happily on a plastic chair.

Unfortunately, it has come to my attention that I am not an elite sleeper after all. 13) It seems I am just lazy, because elite sleepers are defined as the approximately 3% of the population who are biologically programmed to need less sleep than the rest of us. According to a study that came out in March, elite sleepers have rare genetic changes, which means they can sleep fewer hours than mere mortals without any risk of cognitive decline.

14) It may not be possible to change your own genes, but can you train yourself to need less sleep? Is there a non-biological way to reach elite sleeper status? I have spent the past year trying to answer that question. Not for fun, I should add, but because having a baby has severely disrupted my sleep, for which I still have a great passion.

@一起考个四六级

For a while, I assumed I'd be forced to become one of those people who jumps out of bed at the crack of dawn. 15) After a year of tough scientific study, however, I have discovered being forced to get up early in the morning is very different from being an early bird.

Questions 12 to 15 are based on the passage you have just heard.

12. What does the speaker say she did on her ride to the Isles of Scilly?
13. What do we learn from the passage about elite sleepers?
14. What has the speaker been trying to find out over the past year?
15. What has the speaker discovered after a year of tough scientific study?

Section C

Directions: In this section, you will hear three recordings of lectures or talks followed by three or four questions. The recordings will be played only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on **Answer Sheet 1** with a single line through the centre.

Questions 16 to 18 are based on the recording you have just heard.

16. A) We have poor awareness of how many controversial issues are being debated.
B) No one knows better than yourself what you are thinking about at the moment.
C) No one can change your opinions more than those who speak in a convincing tone.
D) We are likely to underestimate how much we can be swayed by a convincing article.
17. A) Their belief about physical punishment changed.
B) Their memory pushed them toward a current belief.
C) The memory of their initial belief came back to them.
D) Their experiences of physical punishment haunted them.
18. A) They apparently have little to do with moderate beliefs.
B) They don't reflect the changes of view on physical punishment.
C) They may not apply to changes to extreme or deeply held beliefs.
D) They are unlikely to alter people's position without more evidence.

Listen

主题：观点的改变

British Psychological Society

We're surprisingly unaware of when our own beliefs change

If you read an article about a controversial issue, do you think you'd realise if it had changed your beliefs?

No one knows your own mind like you do – it seems obvious that you would know if your beliefs had shifted.

16) And yet a new paper in *The Quarterly Journal Of Experimental Psychology* suggests that we actually have very poor awareness of our own belief change, meaning that we will tend to underestimate how much we've been swayed by a convincing article.

The researchers recruited over 200 undergraduates across two studies and focused on their beliefs about whether physical punishment of kids is an effective form of discipline. The students reported their initial beliefs about whether physical punishment is an effective way to discipline a child on a scale from “one” completely disbelief to “nine” completely believe. Several weeks later they were given one of two research-based texts to read: each was several pages long and either presented the arguments and data in favor of physical punishments or against it. After this, the students answered some questions to test their comprehension and memory of the text. Then the students again scored their belief in whether physical punishment is effective or not. Finally, the researchers asked them to recall what their belief had been at the start of the study.

17) The students' belief about physical punishment changed when they read a text that argued against their own initial position. Crucially, the memory of their initial belief was shifted in the direction of their new belief. In fact, their memory was closer to their current belief than their original belief. The more their belief had changed, the larger this memory bias tended to be, suggesting the students were relying on their current belief to deduce their initial belief. The memory bias was unrelated to the measures of how well they'd understood or recalled the text, suggesting these factors didn't play a role in memory of initial belief or awareness of belief change.

18) The researchers concede that this research was about changes to mostly moderate beliefs. It's likely the findings would be different in the context of changes to extreme or deeply held beliefs. However, our beliefs on most topics are in the moderate range, and as we go about our daily lives reading informative material, these intriguing findings suggest we are mostly ignorant of how what we just read has updated and altered our own

CET-6 大学英语六级真题（研读版）

position.

Questions 16 to 18 are based on the recording you have just heard.

16. What does a new paper in *The Quarterly Journal Of Experimental Psychology* suggest?

17. What happened when the students read a text that argued against their own initial position?

18. What did the researchers concede concerning their findings?

Questions 19 to 21 are based on the recording you have just heard.

19. A) American moms have been increasingly inclined to live alone.

B) The American population has been on the rise in the past 25 years.

C) American motherhood has actually been on the decline.

D) The fertility rates in America have in fact been falling sharply.

20. A) More new mothers tend to take greater care of their children.

B) More new mothers are economically able to raise children.

C) A larger proportion of women take pride in their children.

D) A larger proportion of women really enjoy motherhood.

21. A) The meaning of motherhood has changed considerably.

B) More and more mothers go shopping to treat themselves.

C) More mothers have adult children celebrating the holiday.

D) The number of American mothers has been growing steadily.

Listen

主题：母性的衰落

The Atlantic

The Decline of American Motherhood

As the American population grows, so does the number of American moms. But, more than a century after Mother's Day became an official holiday, even as that number increases, the share of the American population who are mothers is at the lowest point in a quarter century.

It's frequently noted that fertility rates are falling sharply in richer countries, but the less observed consequence of this trend is that a decline in births can also mean a decline in motherhood in general. 19)

According to my analysis of data from the Census Bureau, the decline of American motherhood is real, occurring very quickly, and may continue for some time yet.

Not only are moms making up less of the population, but their characteristics are changing too, and in a way that might be linked to their proportional decline. Moms today tend to be older than in the past. Just looking at recent years, the change in age-specific birth rates has been drastic.

In just the past few years, the peak childbearing age range for American women has advanced from that of 25-to-29 to that of 30 to 34. Meanwhile, childbearing among women under 20 has fallen by half or more, while childbearing among women 35 and older is rising.

20) One positive consequence of this age shift is that a larger proportion of new mothers are economically prepared to raise children. Less positively, however, many women find that, as they age, they can't have as many kids as they would like. Plus, having children later in life can increase the risk of health complications. These finer points aside, one major consequence of the older-moms trend is that fewer years of a woman's life are spent as a mother. This means that, at any given time, a larger share of women, and thus of the whole population, will report not having children in government surveys. In other words, later motherhood means less motherhood.

Even as motherhood rates decline, Mother's Day, of course, will endure. In fact, despite the demographic shift, retail spending on the holiday appears to be rising. It is hard to say if Mother's Day spending is rising more than one would expect given that the American population keeps growing, but one factor might be that the proportion of women who are the mothers of adult children is rising. 21) And those adult children may spend more generously when it comes to celebrating the moms they no longer live with.

Questions 19 to 21 are based on the recording you have just heard.

19. What does the speaker conclude from her analysis of the Census Bureau's data?
20. What does the speaker say is a positive consequence of the age shift in childbearing?
21. What might be one explanation for the rise in retail spending on Mother's Day?

Questions 22 to 25 are based on the recording you have just heard.

22. A) Add to indoor toxic pollutants.
- B) Absorb poisonous chemicals.
- C) Beautify the home environment.

- D) Soak up surrounding moisture.
23. A) NASA did experiments in sealed containers resembling the super insulated offices of 1970s.
B) It was based on experiments under conditions unlike those in most homes or offices.
C) NASA conducted tests in outer space whose environment is different from ours.
D) It drew its conclusion without any contrastive data from other experiments.
24. A) Natural ventilation proves much more efficient for cleaning the air than house plants.
B) House plants disperse chemical compounds more quickly with people moving around.
C) Natural ventilation turns out to be most effective with doors and windows wide open.
D) House plants in a normal environment rarely have any adverse impact on the air.
25. A) The root cause for misinterpretations of scientific findings.
B) The difficulty in understanding what's actually happening.
C) The steps to be taken in arriving at any conclusion with certainty.
D) The necessity of continually reexamining and challenging findings.

Listen

主题：盆栽植物与空气净化

Source: The Telegraph

Title: Pot plants barely clean the air, so best to just open a window, say scientists

22) Since NASA published a paper in 1989 claiming that house plants can soak up pollution and toxic chemicals, businesses and homeowners have increasingly invested in greenery to help clean their air. But a new analysis suggests it could actually take more than 1,000 plants per square meter to gain a benefit any greater than simply opening a couple of windows. 23) The problem lies in the fact that NASA conducted their tests in sealed containers that do not simulate the conditions in most people's homes or offices. The space agency was primarily concerned about keeping the air fresh for astronauts cut off in biospheres or space stations, and helping to combat sick building syndrome which had become a problem due to the super insulated and energy efficient offices of the late 1970s.

By the early 1980s, workers regularly complained of skin rashes, sleepiness, headaches and allergies, as they breathed in toxic chemicals from paints and plastics. NASA found that certain plants could remove chemicals from

the air, and even today garden centers recommend the plants for air cleaning properties. 24) However, a new evaluation of dozens of studies spanning 30 years found that house plants in a normal environment have little impact. In fact, natural ventilation is far better at cleaning the air.

The researchers also calculated the “clean air delivery rate” for plants in the studies they analysed and found that the rate at which plants disperse the compounds was well below the usual rates of air exchange in a normal building, caused by the movements of people coming and going, opening doors and windows.

Many of the studies did show a reduction in the concentration of volatile organic compounds over time, which is likely why people have seized on them to praise the air purifying virtues of plants. But the researchers’ calculations showed, it would take 10 to 1,000 plants per square meter of floor space to compete with the air cleaning capacity of a building’s air handling system or even just a couple of open windows in a house.

In contrast, NASA’s sealed experiment recommended one pot plants per 100 square feet. This is certainly an example of how scientific findings can be misleading or misinterpreted over time. 25) But it’s also a great example of how scientific research should continually reexamine and question findings to get closer to the ground truth of understanding what’s actually happening.

Questions 22 to 25 are based on the recording you have just heard.

22. What does NASA’s 1989 paper claim house plants can do?
23. What is said to be the problem with NASA’s study reported in its 1989 paper?
24. What is the finding of a new evaluation of dozens of studies spanning 30 years?
25. What does NASA’s sealed experiment recommendation exemplify in scientists’ pursuit of truth?

Part III

Reading Comprehension

(40 minutes)

Section A

Directions: In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on **Answer Sheet 2** with a single line through the centre. You may not use any of the words in the bank more than once.

[Key] CHMFN OEAGB

- 26. C) dispersion

- 32. E) hanging
- 33. A) bounces
- 34. G) originates
- 35. B) completely

主题：彩虹是如何形成的？

Source: WorldAtlas

Title: How Is A Rainbow Formed?

A rainbow is a multi-colored, arc-shaped phenomenon that can appear in the sky. The colors of a rainbow are produced by the reflection and **26-C) dispersion** of light through water *droplets* (水滴) present in the atmosphere.

An observer may **27-H) perceive** a rainbow to be located either near or far away, but this phenomenon is not actually located at any specific spot. Instead, the appearance of a rainbow depends entirely upon the position of the observer in **28-M) relation** to the direction of light. In essence, a rainbow is an **29-F) optical** illusion.

Rainbows present a **30-N) spectrum** made up of seven colors in a specific order. In fact, school children in many English-speaking countries are taught to remember the name “Roy G. Biv” as an aid for remembering the colors of a rainbow and their order. “Roy G. Biv” **31-O) stands** for: red, orange, yellow, green, blue, indigo, and violet. The outer edge of the rainbow arc is red, while the inner edge is violet.

A rainbow is formed when light (generally sunlight) passes through water droplets **32-E) hanging** in the atmosphere. The light waves change direction as they pass through the water droplets, resulting in two processes: reflection and *refraction* (折射). When light reflects off a water droplet, it simply **33-A) bounces** back in the opposite direction from where it **34-G) originates**. When light refracts, it takes a different direction. Some

CET-6 大学英语六级真题（研读版）

individuals refer to refracted light as “bent light waves.” A rainbow is formed because white light enters the water droplet, where it bends in several different directions. When these bent light waves reach the other side of the water droplet, they reflect back out of the droplet instead of **35-B) completely** passing the water. Since the white light is separated inside of the water, the refracted light appears as separate colors to the human eye.

A) bounces	F) optical	K) preceding
B) completely	G) originates	L) recklessly
C) dispersion	H) perceive	M) relation
D) eccentric	I) permeates	N) spectrum
E) hanging	J) ponder	O) stands

Section B

Directions: In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the questions by marking the corresponding letter on *Answer Sheet 2*.

主题：想要改变行为就要避免这些习惯

Source: FASTCOMPANY

Title: These are the habits to avoid if you want to make a behavior change

（文章为题目改编来源，非原题，仅供回忆参考）

These are the habits to avoid if you want to make a behavior change

- [A] It's difficult to change an ingrained behavior. Even for the most productive and disciplined among us, undoing something that has become an automatic part of who we are takes more than an overnight effort. **38-A)**
- Once we've successfully made that change, we then have to make other adjustments to our lives to ensure that we continue to maintain it, which is often a whole other challenge in itself.
- [B] At its core, success in changing (and maintaining) a behavior rarely occurs without the introduction of some

sort of system. When there isn't the right framework in place, we face a greater likelihood of derailing our hard-earned progress. Here are some habits that we should stay away from:

- [C] Think about the last time you vowed to resist a temptation. Perhaps you didn't want to check your phone every 15 minutes, or you were adamant about not reaching for a chocolate bar at 3 p.m. Think about how difficult it must have been not to glance at your phone when it's within reach, or not to walk to the vending machine when your afternoon slump hits.
- [D] 36-D) The research on whether we have finite or infinite willpower is inconclusive, but experts do generally agree that you can't change (and sustain) a habit if you rely on your willpower alone. As Vivian Giang previously reported for Fast Company, the military saying "You never rise to the occasion, you only sink to the level of training" also applies to behavior change. The idea is simple—you repeat something so many times that it becomes automatic.
- [E] Think about what else you can change about your surrounding that makes it easier for you to perform this change on a daily basis. Charles Duhigg, journalist and author of *The Power Of Habit*, calls this your "cue." Basically, it's a trigger to perform that particular habit. If you don't want to reach to a sugary treat at 3 p.m., have a box of herbal tea ready at your desk. When 3 p.m. comes around, that's your cue to pour yourself a cup of hot water and drink that tea, instead of walking to the vending machine.
- [F] Sometimes, it's not your process that lets you down, but the habit that you want to change in the first place. For starters, not eating chocolate to beat your afternoon slump is a harder goal than swapping chocolate for herbal tea when you reach the designated time. Psychology professor and longtime contributor Art Markman previously wrote for Fast Company, "Your brain wants to find routines that have succeeded in the past and allow you to repeat those actions again in the future without having to think about them explicitly." Markman explains, however, that this habit-learning system isn't so effective when it comes to learning not to do something. 41-F) That's why Markman suggested that rather than giving up something, think about introducing something in its place. He wrote, "focus on actions you are going to take that will ultimately conflict with the behaviors you want to stop." When your attention is on doing something new, "you give your habit system a chance to operate."
- [G] 44-G) Because we are creatures of habit, it's natural to assume that when we do manage to adopt (and

sustain) a desirable behavior, that same strategy will **work** when we want to make **another behavior change**. **But that's not always the case.** Sometimes, the system that got you to change one behavior might **not work for another**.

- [H] Take Rod Favaron, CEO of social media technology company Spreadfast. As Stephanie Vozza previously wrote for Fast Company, Favaron became accustomed to relying on his gut when it comes to decision-making. This served him well at the early stages of his company, yet hindered his company's growth in the later stages. He needed to consider metrics and data, rather than letting his instinct override everything. For example, if you want to stop checking your email first thing in the morning, you might decide to substitute another activity in its place. 40-H) But if you want to stop your after-work Netflix binge, simply deciding you will go for a run might not be as effective. You might need to introduce another reinforcement, such as meeting a friend and booking an exercise class together.
- [I] Of course, even the best-laid plans fail sometimes. You might have stuck to your screen-free nighttime routine for five days, and then a big project lands on your desk and you found yourself in bed with your laptop before you go to sleep. Or you meal-prepped on Sundays and stuck to eating healthy dinners at home, but by Friday you found yourself so exhausted and opted to order greasy takeout. Life happens. As contributor Suzan Bond previously wrote for Fast Company, even if your behavior change is small, "every single day" can prove pretty inflexible, and at some point your streak probably will founder, even if just for a day." 37-I) The perfectionist in you might be screaming to abandon your goals altogether, but try to see it in the bigger picture. Just because you might have temporarily veered off course doesn't mean you can't start fresh the next day.
- [J] Speaking of slipups, here's another habit that many perfectionists tend to fall into when they try to establish a behavior change. 42-J) They focus too much on the big goal and don't take the time to celebrate the small progress they made in the process.
- [K] Because initiating a new behavior usually seems like the hardest part of the process of change, we often fail to adequately prepare for the final phase of Maintenance. Yet without a doubt, maintaining a new behavior is the most challenging part of any behavior change. 39-K) One of the reasons we so often fail at Maintenance is because we mistakenly believe the strategies we used to initiate the change will be equally as effective in

helping us continue the change. But they won't. Where changing a strongly entrenched habit requires changing our belief about that habit that penetrates deeply into our lives, continually manifesting that wisdom (and therefore that habit) requires that we maintain a high life-condition. 45-K) If our mood is low, the wisdom to behave differently seems to disappear and we go back to eating more and exercising less (this isn't, of course, equally true for all behaviors, especially for addictive behaviors we've long ago abandoned). In a high life-condition, however, that changed belief will continue to manifest as action. When you're feeling good, getting yourself to exercise, for example, is easier because the belief that you should exercise remains powerfully stirred up and therefore motivating. The key, then, to maintaining new behaviors...is to be happy! Which is why it's so hard to maintain new behaviors.

- [L] 43-L) Overcoming the behavioral inertia that prevents us from implementing new changes, like eating a healthy diet or exercising, can benefit us in the long run and can improve our physical and mental health.

Just remember that getting started and getting in the habit of our new diet or exercise routine is the hardest part.

36. There is general consensus among experts that willpower alone cannot guarantee one's success in changing and maintaining a habit.
37. One need not abandon their goals completely just because they missed their target temporarily; they can start anew.
38. Research shows it is quite another challenge to maintain a behavioral change after you have initiated it.
39. It is wrong to assume the strategies we use to start a change of behavior will work equally well in helping maintaining it.
40. Sometimes, it may not be successful to simply substitute one activity with another to effect a change of habit; you may need extra reinforcement.
41. One should introduce something new to replace an old habit instead of simply kicking it.
42. Perfectionists focus too much on their big target and neglect celebrating the small gains they make in the process.
43. It is of great benefit to us in the long term to conquer the inertia that stops us from making behavioral changes.

44. The strategy that successfully changed one of your behaviors may not work for some other behavior of yours.
45. Without a happy mood, it seems that our wisdom to adopt a different behavior vanishes.

Section C

Directions: There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on **Answer Sheet 2** with a single line through the centre.

Passage One

Questions 46 to 50 are based on the following passage.

[Key] ABBCD

主题：讽刺

Source: Psychology Today

Title: 3 Ways to Stay Cool in the Face of Sarcasm & Think Sarcasm is Funny? Think Again

46) Sarcasm and jazz have something surprising in common: You know them when you hear them. Sarcasm is mostly understood through tone of voice, which is used to portray the opposite of the literal words. For example, when someone says, "Well, that's exactly what I need right now," their tone can tell you it's not what they need at all.

Most frequently, sarcasm highlights an irritation or is, quite simply, mean.

If you want to be happier and improve your relationships, cut out sarcasm. Why? Because sarcasm is actually hostility disguised as humor. 47) Despite smiling outwardly, many people who receive sarcastic comments feel put down and often think the sarcastic person is rude, or contemptible. Indeed, it's not surprising that the origin of the word sarcasm derives from the Greek word "sarkazein" which literally means "to tear or strip the flesh off". Hence, it's no wonder that sarcasm is often preceded by the word "cutting" and that it hurts.

48) What's more, since actions strongly determine thoughts and feelings, when a person consistently acts sarcastically it may only serve to heighten their underlying hostility and insecurity. After all, when you come right down to it, sarcasm can be used as a subtle form of bullying and most bullies are angry, insecure, or cowardly.

49) Alternatively, when a person stops voicing negative comments, especially sarcastic ones, they may soon start to feel happier and more self-confident. Also, the other people in their life benefit even more because they

no longer have to hear the emotionally hurtful language of sarcasm.

Now, I'm not saying all sarcasm is bad. It may just be better used sparingly — like a potent spice in cooking. Too much of the spice, and the dish will be overwhelmed by it. Similarly, an occasional dash of sarcastic wit can spice up a chat and add an element of humor to it. But a big or steady serving of sarcasm will overwhelm the emotional flavor of any conversation and can taste very bitter to its recipients.

So, tone down the sarcasm and work on clever wit instead, which is usually without any hostility and thus more appreciated by those you're communicating with. In essence, sarcasm is easy while true, harmless wit takes talent.

50) Thus, the main difference between wit and sarcasm is that, as already stated, sarcasm is often hostility disguised as humor. It can be intended to hurt and is often bitter and biting. Witty statements are usually in response to someone's unhelpful remarks or behaviors, and the intent is to untangle and clarify the issue by emphasizing its absurdities. Sarcastic statements are expressed in a cutting manner; witty remarks are delivered with undisguised and harmless humor.

46. Why does the author say sarcasm and jazz have something surprisingly in common?

A) Both are recognized when heard.

B) Both have exactly the same tone.

C) Both mean the opposite of what they appear to.

D) Both have hidden in them an evident irritation.

47. How do many people feel when they hear sarcastic comments?

A) They feel hostile towards the sarcastic person.

B) They feel belittled and disrespected.

C) They feel a strong urge to retaliate.

D) They feel incapable of disguising their irritation.

48. What happens when a person consistently acts sarcastically?

A) They feel their dignity greatly heightened.

B) They feel increasingly insecure and hostile.

C) They endure hostility under the disguise of humor.

CET-6 大学英语六级真题（研读版）

D) They taste bitterness even in pleasant interactions.

49. What does the author say about people quitting sarcastic comments?

A) It makes others happier and more self-confident.

B) It restrains them from being irritating and bullying.

C) It benefits not only themselves but also those around them.

D) It shields them from negative comments and outright hostility.

50. What is the chief difference between a speaker's wit and sarcasm?

A) Their clarity.

B) Their appreciation.

C) Their emphasis.

D) Their intention.

Passage Two

Questions 51 to 55 are based on the following passage.

[Key] ADBDC

主题：可变性的作用——从打网球到学习语言

Source: Max Planck Institute for Psycholinguistics

Title: The role of variability: From playing tennis to learning language

Variability is crucially important for learning new skills. Consider learning how to serve in tennis. Should you always practice serving from the exactly same location on the court, aiming at exactly the same spot? Although practising in more variable conditions will be slower at first, it will likely make you a better tennis player at the end. This is because variability leads to better generalisation of what is learned.

This principle is found in many domains, including speech perception learning categories. 51) For instance, infants will struggle to learn the category 'dog' if they are only exposed to Chihuahuas, instead of many different kinds of dogs.

"There are over ten different names for this basic principle!," says Limor Raviv, the senior investigator of a recent study. "Learning from less variable input is often fast, but may fail to generalise to new stimuli."

To identify key patterns and understand the underlying principles of variability effects, Raviv and her

colleagues reviewed over 150 studies on variability and generalisation across fields, including computer science, linguistics, categorization, visual perception and formal education.

The researchers discovered that, across studies, the term variability can refer to at least four different kinds of variability, such as set size and scheduling. 52) "These four kinds of variability have never been directly compared — which means that we currently don't know which is most effective for learning," says Raviv.

The impact of variability depends on whether it is relevant to the task or not. But according to the 'Mr. Miyagi principle', practicing seemingly unrelated skills may actually benefit learning of other skills.

But why does variability impact learning and generalisation? One theory is that more variable input can highlight which aspects of a task are relevant and which are not.

Another theory is that greater variability leads to broader generalisations. This is because variability will represent the real world better, including *atypical* (非典型的) examples.

53) A third reason has to do with the way memory works: when training is variable, learners are forced to actively reconstruct their memories.

"Understanding the impact of variability is important for literally every aspect of our daily life. Beyond affecting the way we learn language, motor skills, and categories, it even has an impact on our social lives," explains Raviv. 54) "For example, face recognition is affected by whether people grew up in a small community or in a larger community. Exposure to fewer faces during childhood is associated with diminished face memory."

55) "We hope this work will spark people's curiosity and generate more work on the topic," concludes Raviv. "Our paper raises a lot of open questions. Can we find similar effects of variability beyond the brain, for instance, in the immune system?"

51. What does the passage say about infants learning the category "dog" if they are exposed to Chihuahuas only?

- A) They will encounter some degree of difficulty.
- B) They will try to categorise other objects first.
- C) They will prefer Chihuahuas to other dog species.
- D) They will imagine Chihuahuas in various conditions.

52. What does Raviv say about the four different kinds of variability?

- A) Which of them is most relevant to the task at hand is to be confirmed.

CET-6 大学英语六级真题 (研读版)

B) Why they have an impact on learning is far from being understood.

C) Why they have never been directly compared remains a mystery.

D) Which of them is most conducive to learning is yet to be identified.

53. How does one of the theories explain the importance of variability for learning new skills?

A) Learners regard variable training as typical of what happens in the real world.

B) Learners receiving variable training are compelled to reorganise their memories.

C) Learners pay attention to the relevant aspects of a task and ignore those irrelevant.

D) Learners focus on related skills instead of wasting time and effort on unrelated ones.

54. What does the passage say about face recognition?

A) People growing up in a small community may find it easy to remember familiar faces.

B) Face recognition has a significant impact on literally every aspect of our social lives.

C) People growing up in a large community can readily recognise any individual faces.

D) The size of the community people grow up in impacts their face recognition ability.

55. What does Raviv hope to do with their research work?

A) Highlight which aspects of a task are relevant and which are not to learning a skill.

B) Use the principle of variability in teaching seemingly unrelated skills in education.

C) Arouse people's interest in variability and stimulate more research on the topic.

D) Apply the principle of variability to such fields of study as the immune system.

Part IV

Translation

(30 minutes)

Directions: For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on **Answer Sheet 2**.

中国的传统婚礼习俗历史悠久，从周朝开始就逐渐形成了一套完整的婚礼仪式，有些一直沿用至今。

如今的中式婚礼习俗已有很大变化，但婚礼庆典仍然十分隆重。婚礼场地经过精心装饰，以象征喜庆

(jubilation) 的红色为主色调，摆放着许多祝愿新人幸福的物件。在婚礼上，新人要拜天地 (bow to Heaven

and Earth)、拜父母和相互对拜，然后设宴招待宾客，并向宾客敬酒致谢。今天，许多年轻人依然钟情于

CET-6 大学英语六级真题（研读版）

传统的中式婚礼，体验独特而美好的中国式浪漫。

【参考译文】

The traditional Chinese wedding customs have a long history, gradually forming a complete set of ceremonial rituals [marriage etiquette] since the Zhou Dynasty, some of which have been maintained to this day [is still in use today]. Nowadays, Chinese wedding customs have undergone significant changes, but wedding celebrations remain solemn. The wedding venue is meticulously decorated, predominantly in the color of red to symbolize jubilation, adorned with many objects wishing happiness for the newlyweds. During the wedding ceremony, the couple bows to Heaven and Earth, pays respects to their parents, performs mutual bows to each other, hosts a banquet for the guests, and offers toasts in gratitude. Today, many young people still cherish traditional Chinese weddings, experiencing a unique and wonderful Chinese-style romance.
