

2024 年 6 月大学英语六级真题（第三套）

Part I

Writing

(30 minutes)

Directions: For this part, you are allowed 30 minutes to write an essay that begins with the sentence “*Nowadays cultivating independent learning ability is becoming increasingly crucial for personal development.*” You can make comments, cite examples or use your personal experiences to develop your essay. You should write at least 150 words but no more than 200 words. (You should copy the sentence given in quotes at the beginning of your essay.)

【参考范文】

“Nowadays cultivating independent learning ability is becoming increasingly crucial for personal development.”

In today's rapidly changing world, the ability to learn independently is more important than ever. Independent learning empowers individuals to take charge of their own educational journey, beyond traditional classroom settings. This skill not only enhances knowledge acquisition but also fosters critical thinking, problem-solving, and adaptability.

Independent learners possess the initiative to seek out information, resources, and opportunities for growth. They are proactive in setting goals, managing their time effectively, and overcoming challenges without constant supervision. This self-directed approach not only builds confidence but also prepares individuals for lifelong learning in various domains.

For instance, in my own experience, cultivating independent learning skills has allowed me to explore diverse interests beyond my formal education. Through online courses, books, and practical projects, I have developed expertise in areas that traditional schooling did not cover comprehensively. This continuous learning process has not only enriched my knowledge but also expanded my career opportunities and personal fulfillment.

In conclusion, fostering independent learning ability equips individuals with the tools needed to thrive in a dynamic and competitive world. By embracing self-directed learning, individuals can adapt to new challenges, seize opportunities for growth, and achieve their personal and professional aspirations effectively. Therefore,

CET-6 大学英语六级真题（研读版）

investing in independent learning skills **is not just beneficial but essential for** personal development in the modern era.

【范文译文】

“如今，培养独立学习能力对个人发展变得日益关键。”

在当今快速变化的世界中，独立学习能力比以往任何时候都更为重要。独立学习赋予个体主导自己教育旅程的能力，超越传统的课堂设置。这种能力不仅增强了知识获取能力，还培养了批判性思维、问题解决能力和适应能力。

独立学习者具备主动寻求信息、资源和成长机会的倡导能力。他们能够自主设定目标，有效管理时间，并在没有持续监督的情况下克服挑战。这种自主学习的方法不仅建立了信心，还为个人在各个领域中的终身学习做好了准备。

例如，在我的个人经历中，培养独立学习能力使我能够探索传统教育未全面覆盖的多样化兴趣。通过在线课程、书籍和实践项目，我在不同领域获得了专业知识。这种持续学习过程不仅丰富了我的知识，还扩展了我的职业机会和个人满足感。

总之，培养独立学习能力为个人在充满活力和竞争的世界中提供了必要的工具。通过接受自主学习，个人能够应对新的挑战，抓住成长的机会，并有效实现个人和职业的抱负。因此，在现代社会中，投资独立学习技能不仅有益而且至关重要。

Part II Listening Comprehension (30 minutes)

说明：每次全国六级考试一般只考两套听力，第三套为重复题目，只是选项顺序不同，故不再重复。

Part III Reading Comprehension (40 minutes)

Section A

Directions: In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each

CET-6 大学英语六级真题（研读版）

item on **Answer Sheet 2** with a single line through the centre. You may not use any of the words in the bank more than once.

[Key] IOHEG NAFJD

- 26. I) illegally

Title: The Sun is Also a Star – Book Review and Summary

（文章为题目改编来源，非原题，仅供回忆参考）

The Sun Is Also a Star is a truly lovely story of love, romance, fate, and destiny. This love blossoms even while one of the main characters staunchly denies the existence of such fantasies. It's 384 pages long but flies by in an instant. Natasha is a Jamaican born immigrant living **26-I) illegally** in America, not by choice exactly, her parents brought her here and she is resentful of the life she's been handed. ...the situation she **27-O) strives** to be out of ... She is practical and uses her intellect to make all decisions. Daniel is an American born of Korean immigrants. He believes in true love, fate, and all that other malarkey that Natasha **28-H) dismisses** through scientific reasoning.

Through complete happenstance Daniel and Natasha meet by **29-E) coincidence** on the streets of New York on the day that she is to be **30-G) deported**. She doesn't tell him that but does allow him to keep her company

CET-6 大学英语六级真题（研读版）

while he tries to get her to fall in love with him over the course of the day.

Natasha is me. I found her so ultimately relatable. She’s scientifically minded, practical, somewhat cynical, and always **31-N) skeptical**. Her infatuation with the universe through a scientific lens is infectious and I **32-A) adore** that Daniel sees that too.

Daniel is adorable. He is charming and passionate and has a way with words that even **33-F) cracks** Natasha’s tough outer shell. By the end of the book I fell in love with both of them.

I used to find romance stories to always be cheesy or laughable. I think now I can see the value in escaping into a story of pure optimism. I got **34-J) lost** in The Sun is Also a Star and finished it cover to cover in a weekend. I couldn’t wait to get to what I hoped would be a happy ending.

It’s nice every once in a while to give in to magic. It doesn’t have to be a hard fantasy novel with actual spells, it can be the magic found between two people who just have that special something. That **35-D) chemistry** that causes them to react and spark when they’re near each other.

A) adore	F) cracks	K)
B)	G) deported	L)
C)	H) dismisses	M)
D) chemistry	I) illegally	N) skeptical
E) coincidence	J) lost	O) strives

Section B

Directions: In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the questions by marking the corresponding letter on **Answer Sheet 2**.

Title: Blame your worthless workdays on ‘meeting recovery syndrome’

（文章为题目改编来源，非原题，仅供回忆参考）

Blame your worthless workdays on 'meeting recovery syndrome'

- [A] Phyllis Hartman knows what it's like to wade through the depths of office meeting hell. Managers at one of her former human resources jobs arranged so many meetings that attendees would fall asleep at the table or intentionally arrive late. With hours of her day blocked up with unnecessary meetings, she was often forced to make up her work during overtime. "I was actually working more hours than I probably would have needed to to get the work done," says Hartman, who is founder and president of PGHR Consulting in Pittsburgh in the US state of Pennsylvania, and an expert panellist for the Society for Human Resource Management.
- [B] She isn't alone in her frustration – not by a long shot. Between 11 million and 55 million meetings are held each day in the United States, costing most organisations between 7% and 15% of their personnel budgets.
- 40) Every week, employees spend about six hours in meetings, while the average manager meets for a staggering 23 hours.
- [C] 44-C) And though experts agree that traditional meetings are essential for making certain decisions and developing strategy, some employees view them as one of the most unnecessary parts of the workday. The result is not only hundreds of billions of wasted dollars, but an exacerbation of what organisational psychologists call "meeting recovery syndrome": time spent cooling off and regaining focus after a useless meeting.
- [D] 36-D) Meeting recovery syndrome (MRS) is a concept that should be familiar to almost anyone who has held a formal job. It isn't ground-breaking to say workers feel fatigued and bleary after a meeting, but only in recent decades have scientists deemed the condition worthy of further investigation. With its links to organisational efficiency and employee wellbeing, MRS has attracted the attention of psychologists aware of the need to understand its precise causes and cures.
- [E] Today, insofar as researchers can hypothesise, MRS is most easily understood as a slow replenishment of finite mental and physical resources. When an employee sits through an ineffective meeting their brain power is essentially being drained away, says Joseph A Allen, a professor of occupational and environmental health at the University of Utah. 42-E) Meetings sap stamina if they last too long, fail to engage employees or

turn into one-sided lectures. Taking time to recover is a must, but all too often doing so comes at the expense of productivity.

- [F] The conservation of resources theory, originally posited in 1989 by Dr Stevan Hobfoll, states that psychological stress occurs when a person's resources are threatened or lost. When resources are low, a person will shift into defence to conserve their remaining supply. In the case of office meetings, where some of employees' most valuable resources are their focus, alertness and motivation, this can mean an abrupt halt in productivity as they take time to recover. As humans, when we transition from one task to another on the job – say from sitting in a meeting to doing normal work – it takes an effortful cognitive switch. We must unstick ourselves from the previous task and expend significant mental energy to move on, Allen says. 39-F) "If we are already drained to dangerous levels... then making the mental switch to the next thing is extra tough," he says. "It's common to see people cyber-loafing after a frustrating meeting, going and getting coffee, interrupting a colleague and telling them about the meeting, and so on."
- [G] Each person's ability to recover from horrible meetings is different. Some can bounce back quickly, while others carry their fatigue until the end of the workday. Yet while no formal MRS studies are currently underway, Allen can loosely speculate on the length of an average employee's lag time. Switching tasks in a non-MRS condition? Perhaps 10 to 15 minutes. With MRS, it may take as long as 45 minutes on average.
- [H] 37-H) In an effort to combat the side effects of MRS Allen, along with researcher Joseph Mroz and colleagues at the University of Nebraska Omaha, published a study detailing the best ways to avoid common traps, including a concise checklist of dos and don'ts applicable to any workplace. Drawing from around 200 papers to compile their comprehensive list, Mroz and his team may now hold a modern antidote to the largely undefined problem of MRS.
- [I] Mroz says a good place to start is asking ourselves if our meetings are even necessary in the first place. If all that's on the agenda is a quick catch-up, or some non-urgent information sharing, it may better suit the group to send around an email instead. "The second thing I would always recommend is keep the meeting as small as possible," says Mroz. "If they don't actually have some kind of immediate input, then they can follow up later. They don't need to be sitting in this hour-long meeting." 43-I) Less time in meetings would ultimately lead to more employee engagement in the meetings they do attend, which experts agree is a

proven remedy for MRS.

- [J] Employees also feel taxed when they are invited en masse to meetings that don't inspire participation, says Cliff Scott, professor of organisational science at the University of North Carolina at Charlotte. It takes precious time for them to vent their emotions, complain and try to regain focus after a pointless meeting – one of the main pitfalls of MRS. Over time as employees find themselves tied up in more and more unnecessary meetings – and thus dealing with increasing lag times from meeting recovery syndrome – the waste of workday hours can feel insulting.
- [K] 41-K) Despite the relative scarcity of research behind the subject, Hartman has taught herself many of the same tricks suggested in Mroz's study, and has come a long way since her days of being bogged down with unnecessary meetings. The people she invites to meetings today include not just the essential employees, but also representatives from every department that might have a stake in the issue at hand. Managers like her, who seek input even from non-experts to shape their decisions, can find greater support and cooperation from their workforce, she says.
- [L] But the onus to keep meetings on track doesn't fall solely on managers. Attendees can derail even a well-structured meeting if they act negatively, says Mroz. If other people start to agree with their criticisms, a "complaining cycle" can quickly drag down momentum and make it difficult for the leader to get everyone back on track. 45-L) If an organisation were to apply all 22 suggestions from Mroz and Allen's findings, the most noticeable difference would be a stark decrease in the total number of meetings on the schedule, Mroz says. Less time in meetings would ultimately lead to more employee engagement in the meetings they do attend, which experts agree is a proven remedy for future cases of MRS.
- [M] While none of the counter-MRS ideas have been tested empirically yet, Allen says one trick with promise is for employees to identify things that quickly change their mood from negative to positive. As simple as it sounds, finding a personal happy place, going there and then coming straight back to work might key to expediting recovery time.
- [N] Leaders should see also themselves as "stewards of everyone else's valuable time", adds Steven Rogelberg, author of The Surprising Science of Meetings. Having the skills to foresee potential pitfalls and treat employees' stamina with care allows leaders to provide effective short-term deterrents to MRS. Most

important, however, is for organisations to awaken to the concept of meetings being flexible, says Allen. 38-N)

By taking a proactive approach to reshaping the way they prioritise employees' time, companies can eliminate the very sources of MRS in their tracks.

- [O] "We have to flip the script of years and years of socialisation and the acceptance of meetings as sites of pain, when they should be places of gain," Allen says. "All we have to do is convince people they are not helpless, it is not hopeless, and here's some things you already know that can make your work-life better, one meeting at a time."
36. Although employees are said to be fatigued by meetings, the condition has not been considered worthy of further research until recently.
37. Mroz and his team compiled a list of what to do and what not to do to remedy the problem of MRS.
38. Companies can get rid of the root cause of MRS if they give priority to workers' time.
39. If workers are exhausted to a dangerous degree, it is extremely hard for them to transition to the next task.
40. Employees in America spend a lot of time attending meetings while the number of hours managers meet is several times more.
41. Phyllis Hartman has learned by herself many of the ways Mroz suggested in his study and made remarkable success in freeing herself from unnecessary meetings.
42. When meetings continue too long or don't engage employees, they deplete vitality.
43. When the time of meetings is reduced, employees will be more engaged in the meetings they do participate in.
44. Some employees consider meetings one of the most dispensable parts of the workday.
45. According to Mroz, if all his suggestions were applied, a very obvious change would be a steep decrease in the number of meetings scheduled.

Section C

Directions: There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on **Answer Sheet 2** with a single line through the centre.

CET-6 大学英语六级真题（研读版）

Passage One

Questions 46 to 50 are based on the following passage.

[Key] BCAAD

主题：真人秀节目和美国的梦

Source: British Psychological Society

Title: Reality TV fuels people's belief in the American Dream

（文章为题目改编来源，非原题，仅供回忆参考）

The "American Dream" is deeply rooted in the national identity of the United States. It promises that in the Land of Opportunity, any individual can climb the economic ladder and prosper through hard work and ambition alone. 46) And yet, young Americans today are struggling to earn more than their parents did at the same age, and upward mobility in the US actually compares unfavourably to that of other industrialised nations.

So why does the idea of the American Dream persist? A new study in the *American Journal of Political Science* identifies one factor that has been overlooked: the influence of reality TV.

Reality shows have come to dominate US television over the past 20 years, notes Eunji Kim from Vanderbilt University. 47) And her analysis shows that the overwhelming majority of these have a "rags-to-riches" storyline: they feature ordinary Americans who work hard to achieve great economic success. Think of something like American Idol: these are everyday people who put in a lot of work rehearsing and going through multiple nerve-wracking performances, before potentially receiving a life-changing record contract and several thousand dollars. 48) And while these programmes are regularly among the most-watched shows, news broadcasts — which paint a more realistic view of the economic hardship faced by millions of Americans — get a much smaller proportion of the viewership.

So rags-to-riches stories are ubiquitous on TV — but does watching these programmes actually convince people that economic mobility is easily attainable? To find out, Kim's team had participants watch a 5 minute clip from a reality show such as Shark Tank or America's Got Talent, edited to ensure it retained its rags-to-riches storyline (for instance, the Shark Tank clip showed two young people pitching their business before getting a successful deal). Control participants watched a clip from a reality show that didn't have a rags-to-riches story

(they saw a woman learning how to improve the behaviour of her dog). After watching the shows, participants rated how much they agreed with four statements relating to the American Dream, such as “It is possible to start out poor in this country, work hard, and become well-off”.

The results showed that those who’d watched a rags-to-riches clip did indeed have a significantly greater belief in the American Dream. 49) Interestingly, when participants were separated by party affiliation, this effect was significant among Republicans but not Democrats, suggesting that the kind of messages implicit in these TV shows may play into people’s existing socioeconomic beliefs.

Kim also conducted a survey of 3,000 US residents, who again answered questions about their belief in the American Dream. They also rated the extent to which they believed success in life is related to various internal factors (such as ambition) and external factors (such as family wealth). Finally, they read a list of TV programmes and indicated which they regularly watched. These included 12 rags-to-riches shows, 8 other reality shows, and 10 sports programmes.

Participants who were heavy viewers of rags-to-riches programmes (regularly watching 6 or more of the shows) or frequent viewers (regularly watching 3-5 shows) had a stronger belief in the American Dream than those who never watched such shows. Heavy viewers were also more likely than non-viewers to attribute getting ahead in life to internal factors like ambition and hard work. And these effects held when controlling for the amount of other TV participants watched, so it wasn't simply that these people were watching more TV in general.

Kim concludes that “rags-to-riches entertainment media are an important cultural force that promote and perpetuate beliefs in upward mobility”. 50) And here’s the problem: if people mistakenly believe that hard work is all that is needed for individuals to make a better life for themselves, they may be less supportive of policies that could actually combat inequality.

It’d be interesting to see whether there are similar links between watching reality TV shows and economic beliefs in other countries, including here in the UK (which may not have the equivalent of the American Dream, but ranks similarly poorly in terms of upward mobility). And, of course, there are many other factors beyond people’s media habits that influence these beliefs: for instance, being older or having immigrant parents were just as important predictors of belief in the American Dream as watching rags-to-riches shows.

Still, the work shows the importance of studying the sociopolitical messages implicit in TV shows —

CET-6 大学英语六级真题（研读版）

particularly in light entertainment, which has traditionally been ignored by researchers in favour of news and other overtly political media. "In this era of choice, entertainment media is what captivates hearts and minds," Kim writes. "Its political consequences are anything but trivial".

46. What do we learn from the passage about young Americans of today?

B) They find it difficult to achieve upward mobility.

47. What does Kim's team find about reality TV shows in America?

C) They help strengthen people's conviction in the American Dream.

48. What does the author say about news broadcasts in America?

A) They attract far fewer viewers than reality TV.

49. What can we infer from the passage about Republicans in general?

A) They believe strongly in the American dream.

50. What is stated about people who believe in upward mobility?

D) They are less likely to approve of policies to fight inequality.

Passage Two

Questions 51 to 55 are based on the following passage.

[Key] CDBDA

主题:

Source:

Title:

When someone asks us 'what do you do?'

51. What do we learn from the passage about one's loss of a job?

C) It renders them puzzled about who they are.

52. What has the author come to understand about our identity?

D) It is more complicated than it appears.

53. What does the passage say about our identities at work?

B) They evolve with the passage of time.

54. What do we have to do in today's ever-changing job market?

CET-6 大学英语六级真题（研读版）

D) Learn to manage uncertainty.

55. What should we do to expand our career options?

A) Alter our perceptions of ourselves.

Part IV

Translation

(30 minutes)

Directions: For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on **Answer Sheet 2**.

中国盛产竹子，是最早开发利用竹资源的国家。竹子在中国分布广泛，品种丰富。竹子实用性强，用于生产和生活的许多方面，如筷子、桌椅的制作和桥梁、房屋的建造。中国人爱竹，自古以来就有无数文人以竹为主题，创作了绚丽多彩的文学和绘画作品。竹子主干（stem）笔直，象征正直的品格。竹子具有强大的生命力和适应能力，无论环境多么恶劣，都能够顽强生存，因而寓意坚韧不拔的精神。几千年来，竹子一直被视为中华民族品格的象征。

【参考译文】

China is rich in bamboo and was one of the earliest countries to develop and utilize bamboo resources. Bamboo is widely distributed in China with diverse varieties. Bamboo is highly practical and used in many aspects of production and daily life, such as making chopsticks, tables, chairs, bridges, and houses. Chinese people have a deep affection for bamboo, and since ancient times, countless literati have used bamboo as a theme to create colorful literary and artistic works. The stem of bamboo is straight, symbolizing upright character. Bamboo possesses strong vitality and adaptability, able to survive even in harsh environments, thus symbolizing tenacity and resilience. For thousands of years, bamboo has been regarded as a symbol of the Chinese national character.
